The D-H Commitment to Imaging Safety

My Medical Imaging History

This record card can help you—and your healthcare providers—know how much and what kind of imaging you've had. Before any imaging exam or image-guided procedure, remember to ask your doctor.

- why do I need this exam?
- does it involve radiation?
- are there radiation-free alternatives?

There are potential risks and benefits with every imaging study. Your medical imaging team—including your doctor, radiologist, radiologic technologists and nurses— are trained to evaluate these risks and benefits. Ask us about any concerns you may have about your scheduled procedure.
