

The Movement Disorders Resource Center is here to:

Provide information, materials, and programs to help those with movement disorders and their caregivers manage their every day lives and serve as a resource when they have questions or concerns.

Enhance the quality of life for people with movement disorders and their caregivers by providing information about:

- Support group meetings
- Physicians, allied health professionals, home care agencies and other resources
- Current therapies and research programs
- Exercise, dance, tai chi, massage and other non-medical therapies

Increase public awareness of movement disorders by offering:

- Educational events
- Free informational pamphlets and booklets
- Lending library with books, videos, and DVDs
- Newsletters
