

Individual items found under the Labs tab in chart review contain a high level of detail, including ordering, collection, and demographic information. If you prefer, the **Lab Flowsheets** view provides a more concise view or printout with just the date, test, value, and reference range.

From the **Labs** tab in chart review, select one, several, or all of the entries you see. Then click the **Lab Flowsheets** button to see results in flowsheet view:

Checkbox in header row selects all/ deselects all

NOTE: For non-numeric results you'll need to return to Chart Review for the full report

You might also want to try the **Results Review** activity. There you can get a similar view with added functionality and flexibility.
