

NeoNatal/Newborn Intubation Trainers Simulates a non-anesthetized patient for teaching intubation, ventilation, and suction.

NeoNatal/Newborn allows teaching of intubation skills on the newborn baby. Robust and realistic, this model allows students to undertake training that is directly transferable to the clinical setting.

- Realistic anatomy of a newborn baby
- Intubation (oral and nasal)
- Bag-Valve-Mask ventilation
- Correct tube placement can be checked by practical inflation test.
