SimMan 3G

SimMan 3G can display neurological symptoms as well as physiological. It is designed to deliver the most realistic training possible whilst remaining easy to set up and simple to operate.

SimMan 3G comes with a long list of features that will optimize simulation training scenarios including automatic drug recognition, light sensitive pupils and bodily fluid excretion. These features provide the opportunity to practice many basic and advanced clinical skills without risk to patients.

Wireless technology makes SimMan 3G flexible and mobile, so that it is possible to conduct training for the entire rescue chain and allow team training which includes patient handover and emergency reporting.
