

SimMan Essential

A realistic, full-body adult, wireless patient simulator, SimMan® Essential offers comprehensive clinical functionality to teach the core skills of airway, breathing, cardiac and circulation management.

Offering educators realistic and engaging scenario-based simulation to challenge and evaluate critical thinking and clinical decision-making skills, SimMan Essential provides numerous educational opportunities for its users.

The wireless configuration of SimMan Essential makes it possible to move quickly to wherever your training will be most efficient and realistic. From an emergency situation in a remote location through the process of definitive care in a hospital, from a war-torn battlefield to a busy hospital ward – SimMan Essential injects a greater realism into scenario based training.
